

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

October; the "History of Pre-Clusian Botany in its Relation to Aster," by Dr. Edward Sandford Burgess, constituting Vol. 10 of the Memoirs, was published in November; and the "Flora of New Providence and Andros (Bahama Islands)" by Mrs. Alice R. Northrop, forming No. 1 of Vol. 12 of this series, was issued December 10.

Messrs. Charles Humphrey Bissell and Luman Andrews have recently published a "Flora of the Town of Southington and its Vicinity: A List of the Fern and Seed Plants growing without Cultivation." In an area of approximately thirty-six square miles 1,201 species are listed. An interesting comparison is made, by families, with the 1,563 species reported in the Flora of Vermont published in 1900.

The death of Dr. Timothy Field Allen occurred at his home in New York on December 5, after an illness of many months. He was born in Westminster, Vt., April 24, 1837. Dr. Allen was not only distinguished in his profession as a physician and surgeon, but was also for many years the leading American student of the Characeae. An account of his collections of Characeae, which he presented to the New York Botanical Garden about two years ago, was published in the *Journal* of the Garden for April, 1901. Dr. Allen was a charter member of the Torrey Botanical Club and had been for many years its senior Vice-President. It is expected that a more extended notice of his life and work will appear in an early number of the *Bulletin* of the Club.
